

A QUANTA SERVICES COMPANY

# ELECTRICAL TESTING

Our specialists follow the testing, operating and safety standards (NETA, IEEE, ANSI, and NFPA).

North Sky Engineering's goal is to ensure that your systems are fully operable at full capacity. If the systems are found to be inoperable, the technicians have the expertise to fully review the collected data and provide our clients with the necessary diagnostic solutions and maintenance schedules.

# TESTING EQUIPMENT

Innovative Solutions  
for Complex Projects

North Sky Engineering employs a staff of highly trained field service engineers and technicians, & is one of the few firms to offer Mobile Diagnostic & Testing. We can provide emergency services, diagnose the problems, and facilitate outage restoration. In order to remain at the cutting edge of our industry we are in a continual state of updating and/or replacing the test equipment that we utilize. The following is a list of the current testing equipment that we have to offer. If you don't see what you are seeking on the printed list, please give us a call to inquire after our most current equipment inventory list.

VON - Cable Thumper

RADIODETECTION - Fault Locator

AMPROBE DM111 - Power Quality

DENT ELITE PRO - Data Logger

ULTRA TEV EA TECH - Partial Discharge
